

STUFF

ANGLED SPARE TIRE MOUNT

Constructed using 1 1/4" steel tubing and MIG welded at the joints for long lasting strength and durability. The angled spare tire mount allows you to securely carry a full size spare tire, up to 35" tall, in the bed of your truck. Installation only requires drilling four holes to secure one of the cleanest working spare tire carriers available.

FLAT SPARE TIRE MOUNT

This simple flat mount allows you to position a tire anywhere in the bed of your truck. You can mount the base plate directly in your bed, for a permanent mount, or spend a little extra time placing the mounting plate underneath your bed, allowing you to remove your spare tire without anyone knowing it was ever there.
