COMPLETE INFORMATION

There are about 200 products shown in this catalog. Overall, there are over 12,000 products available from the Mr. Gasket Performance Group Companies. For COMPLETE product and application information, visit your local performance specialist or visit www.mrgasket.com and download all of the Mr. Gasket Performance Group catalogs.

6650B

THE ORIGINAL STREET SCOOP

These cast aluminum Street Scoops are fully machined and available polished or in a classic black wrinkle finish. They feature large diameter red anodized butterflies that operate off the carburetor linkage. Designed to bolt on to most stock and tunnel ram manifolds and superchargers that use two inline 4-bbl. carburetors with 5-1/8" diameter necks and 7-3/4" to 9-1/4" center line spacing. Also fits single 4-bbl. carburetors.

	Polished	Black
Fits most two 4-bbl. carb. set ups66506650B
Fits most single 4-bbl. carb. set ups66516651B

6658

STREET SCOOP II

Here's the sequel to The Original Street Scoop. For single four-barrel carburetors, a shorter version, only 14-1/2" long, a full 5-1/2" shorter than The Original Street Scoop! Ideal for V6 and small V8 engines.

	Polished	Black
Fits 5-1/8" diameter carb neck66586658B

5232B

5233

HILBORN STYLE SCOOPS

These authentically styled air scoops are made from highly polished aluminum castings and fit single or dual carb applications using carburetors with 5-1/8" diameter necks. The dual carb scoop features an adjustable base to fit carburetor's with 7-5/8" to 9-1/4" center line spacing.

Description	Length	Width	Height	Polished	Black
Single Four Barrel	...13-5/8"	...9-3/4"	...5-9/16"	...5232	...5232B

6477

LOUVERED AIR CLEANERS

These louvered air cleaners are made from heavy gauge steel and are chrome-plated and polished to a high luster. Includes stud and wing nut. The 14" diameter air cleaner features thirteen groups of five louvers each. The low profile design is 2-1/2" high and fits carburetors with 5-1/8" diameter necks. The 6" diameter air cleaner is ideal for use on most tri-power carburetor set-ups. It includes a mounting stud and wing nut. Fits 2-5/16", 2-5/8" and 3" diameter carb necks.

14" Louvered Air Cleaner6477
6" Louvered Air Cleaner6475

4338

LOW RIDER AIR CLEANERS

These 14-inch air cleaners are designed to fit vehicles where the hood clearance is minimal. These air cleaners feature a chrome-plated top with a flame-retardant, high CFM filter for maximum efficiency. All applications come with PCV fittings and necessary hardware for easy installation. Height is 2-1/4" inches.

2-bbl. with 3" carb. neck4338
2-, 3- and 4-bbl. with 51/8" dia. carb. neck, ideal for Corvettes	...4339

AIR CLEANERS & SCOOPS

CHROME-PLATED ALUMINUM AIR CLEANERS

These air cleaners are available in three eye-catching shapes: round, triangle, and oval, and in three different designs: wild flames, smooth ball milled, or classic bright polish. Fits 5-1/8" diameter carburetor necks.

12" x 2" Oval-Plain Top9155G

6854

ALUMINUM VALVE COVERS

These aluminum valve covers are precision die cast for light weight and a perfect fit. Beautifully polished to a high luster, they are sure to enhance the appearance of any engine compartment. They feature an extended sealing lip to positively locate and secure the gasket and stop it from moving under pressure to eliminate oil leaks. The valve cover tops are a full .125" thick so they can be custom milled or engraved. These valve covers are available with plain or ball-milled tops and include a 1 1/4" diameter breather hole, except where noted. Packaged two per set.

BILLET STYLE ALUMINUM PULLEYS

These machined aluminum pulleys are designed to fit most Chevy small block engines. All pulleys are heat-treated and have an attractive satin finish. Also available is a matching water pump nose cover, which conceals the end of the pump shaft for that hi-tech look, and an aluminum alternator pulley for GM applications. All pulleys and nose covers are sold separately. For Small Block Chevrolet applications only.

PERFORMANCE POWER PULLEYS

These underdrive pulleys are engineered for high performance and daily street driving. Dynamometer tests have shown an increase of up to 18 streetable horsepower with the installation of a Mr. Gasket Performance Power Pulley Kit. All pulleys are CNC machined from aircraft quality material and are computer designed and tested to assure that electrical and cooling systems function properly. Recommended replacement belt numbers are included in instructions where necessary.

FLUIDZAP™

FluidZap is a highly absorbent disposable pad that can contain any automotive liquid including gasoline, transmission fluid, motor oil, brake fluid, anti-freeze, power steering fluid, water and more.

It is perfect for use under cars, trucks, motorcycles and lawn equipment – or anywhere that something may leak and spill causing a dirty or unsafe condition. It is also ideal for use on workbenches – especially when working on oily or greasy projects like transmissions or small engine repairs. FluidZap pads are so absorbent that each pad can contain up to 1/2 quart of oil!

Single 17" x 23" pad3698
Box of 150 17" x 23" pads3699
Roll of 133 pads3700

Conserve our Natural resources. Dispose of used pads according to your Federal, State or Local disposal laws.

BILLET ALUMINUM ALTERNATOR FAN AND PULLEY

This lightweight billet aluminum alternator fan and pulley replaces the stock stamped steel fan and pulley and gives the alternator that dynamic hi-tech look. Fits most GM-Delco, and Ford alternators.

Fan5602G
Pulley5599

LOW MOUNT ALTERNATOR BRACKET

Designed to mount the alternator on the lower front drivers side of a Small Block Chevy. Made from heavy gauge steel to eliminate flex, the brackets are highly polished then chrome plated. Kit must be used with the short water pump for proper pulley alignment and is complete with hardware and detailed instruction sheet.

Low Mount Alternator Bracket Kit5179

STAINLESS STEEL BATTERY TRAY

This polished stainless steel battery tray resists rust and corrosion and will accommodate batteries up to 7-1/4" wide x 13-1/8" long. Includes stainless steel H-style hold-down top bracket.

Stainless Steel Battery Tray5282

CHROME-PLATED EXHAUST MANIFOLD COVERS

Fabricated from heavy gauge steel and chrome-plated, these covers feature a louvered top for faster heat dissipation and are made to cover the stock OEM exhaust manifolds on small block Chevrolet engines without A/C.

Chrome-Plated Exhaust Manifold Covers5117

STAINLESS STEEL MOTOR MOUNT COVERS

Made from pre-polished, heavy gauge stainless steel, these covers will fit over most Chevrolet V-8 motor mounts.

Stainless Steel Motor Mount Covers5285

5285

GROMMET SET

This heavy-duty grommet set includes 30 of the most popular grommets as used in automotive sheet metal applications. The grommets feature an extra thick wall section to insulate and protect wires, cables, hoses, etc. from the sharp sheet metal edges. Kit includes six grommets of each size to fit the following hole diameters: 1/2", 5/8" 3/4" 7/8" & 1"

Grommet Set3706

3706

HIGH PERFORMANCE ELECTRIC COOLING FANS

SIMPLY PUT: These fans are the best on the market!

HERE'S WHY: High torque, low amperage draw motor.

The motor rides on Dual Ball Bearings, not on bushings like some others. Reversible Fan Blades engineered to provide maximum air flow. Our fans provide more efficient cooling at low speeds where it is needed most. They also free up more usable horsepower to the rear wheels, and increase fuel economy. Their extremely low profile design makes installation easy even in very limited space. With five sizes to choose from, all being reversible, it makes it easy to find your customers the correct fan for their specific application. Ideal for replacement automotive engine cooling fans where applicable, remote engine oil or automatic transmission oil cooler applications. Perfect for installations where air flow is limited or does not exist in, such as under chassis, rear under-body, and trunk mount cooler installations. Perfect for street rods, recreational or towing vehicles, custom-built kit cars and engine swaps.

PERFORMANCE GASKETS

For complete gasket application information, refer to the Mr. Gasket catalog or www.mrgasket.com

ULTRA-SEAL® HEAD GASKETS

- Five layer (graphite core/ perforated steel outer layers) composition construction
- Graphite core has excellent thermo-conductivity; transfers heat away from hot spots in head to coolant passages, this prevents gasket burn-out
- Provides excellent stability, compressibility and high temperature endurance
- Will not creep, cold-flow or brinell (indent) aluminum cylinder heads
- For high performance street, drag race and oval track
- Packaged 2 per set

DESCRIPTION	PART NO.

ULTRA-SEAL® EXHAUST & COLLECTOR GASKETS

These premium exhaust gaskets are designed and constructed to improve sealing of exhaust header flanges. Unlike standard exhaust material, ULTRA-SEAL exhaust gaskets incorporate a graphite-impregnated facing and steel expanded metal core that reinforces and increases the tensile strength. This gives the gasket the ability to conform to warped flanges, allowing better sealing capabilities without deteriorating or cracking under excessive heat and pressure of racing engines.

ULTRA-SEAL® VALVE COVER GASKETS

Made from cork particles blended with special polymers to make our Ultra-20 material. The Ultra-20 material is far superior to standard cork, rubber, or fiber valve cover gaskets because this unique blend causes the Ultra-Seal valve cover gasket to swell to a controlled thickness and not contract like other gaskets do; you will not need to retorque the valve covers. They retain a high-tensile strength to compensate for excessive flange pressures and will not lose compressibility or heat harden under severe racing conditions.

5001

Show quality chrome plated fasteners are available in your choice of Grade 5 hex head, Grade 8 socket head, or Grade 8 twelve point head. The bolt heads of these quality fasteners are individually polished to a high luster, then chrome plated for lasting beauty. Kits come complete (except where noted) with "AN" type washers which have no exposed shoulders past the bolt heads to give a very professional appearance. Ideal for street rods and street machines, or any vehicle requiring show quality chrome.

GFLEX™ FLEXIBLE HOSES

These hoses create a unique look and aid in cooling. They are ideal for engine and radiator swaps. The adapters will accommodate from 1-1/8" to 1-3/4" applications. Hose cuts easily with a common fine tooth hacksaw and cleans easily with mild soap and water. The corrosion-resistant 300-series stainless steel can be shaped in unlimited configurations and will hold its shape once formed. Finishes are heat-resistant flexible high gloss powder coating or triple chrome-plated. Kits include hose, two 3" connectors, two 1-1/8" & two 1-1/2" adapters, four hose clamps and billet covers where noted.

TITAN-LITE™ SOUND DAMPING MATERIAL

Although extremely light-weight, Titan-Lite is a giant among dampening materials. It provides twice the dampening capability, and is 40% lighter than any of our competitors asphaltic product. Its aggressive adhesive withstands water, fuel, most solvents and temperatures in excess of 250° F, and it stretches up to 40% for 100% bonding to irregular surfaces.

Sample applications include: interior panels to cure annoying squeaks and buzzes, exterior moldings, license plate frames and mounting surfaces, under carpets and upholstery, speaker installations and subwoofer enclosures and under headliners. The possibilities are endless.

Titan-Lite™ Sound Damping Material11027
Includes .075" thick, 12"x32" roll

NEO-FOAM INSULATOR™ SOUND DAMPING MATERIAL

Effective anti-rattle, cushioning gasket material. 1/8" thick nitrile neoprene composite foam with simple peel and stick design. It's water resistant, aggressive adhesive withstands temperatures in excess of 250° F with no unpleasant odors.

Sample applications include: interior panels to cure annoying squeaks and buzzes, exterior moldings, license plate frames and mounting surfaces, under carpets and upholstery, speaker installations and subwoofer enclosures and under headliners. The possibilities are endless.

Neo-Foam Insulator™ Sound Damping Material11029
Includes four .125" thick 10"x10" black sheets

G-SPRAY™ SPRAY-ON SOUND DAMPING MATERIAL

G-Spray is a vibration-dampening compound engineered specifically for spray applications. This product should not be confused with common rubberized undercoating. G-Spray visco-elastic spray contains a significant mineral load; it will convert vibration energy into low level heat, providing twice the dampening characteristics of other asphalt material. G-Spray also contains a corrosion inhibitor.

Use on hard to reach or difficult contours exist. Inside doors, kick panels, trunk wheelwells subwoofer enclosures, body panels, marine hulls, and machinery enclosures. Works great on primed or coated metal, fiberglass, plastic and wood. The possibilities are endless.

IGNITION SYSTEMS & ACCESSORIES

DIGITAL FUEL INJECTION SYSTEMS FOR SMALL BLOCK CHEVY AND FORD ENGINES

Introducing the Pro-Ram Single Plane Small Block Multi-Port Spark/Fuel Management. The new system is available with a cast 750 CFM throttle body, single plane intake manifold, and 30#/hr injectors for engines producing up to 500HP**. For engines producing over 500HP, the system is available with 36#/hr injectors and a billet 1200 CFM throttle body. The manifold, produces excellent power from 2000 RPM to 7000 RPM, has optimized runners for precise air delivery and correct fuel distribution. The system includes intake manifold, throttle body, injectors, ECM, fuel pump, wiring harness, and all components necessary for installation.

** Small block Ford applications include 24 #/hr injectors and is ideal for engines producing up to 400HP. 30#/hr injectors are included with the 1200cfm kit and provides excellent power from 2800 RPM to 7000 RPM. Custom orders available upon request.

ACCEL 5MM SPARK PLUG WIRES

A radical departure from anything ever offered! Think bigger is better? Think again. With half the diameter of today's standard wires, they are extremely flexible and offer extreme space and weight savings. With the performance of 150 ohms per foot Ferro-Spiral wound alloy conductor, these wires deliver maximum energy to the spark plug and provide superior performance. Available in four colors: blue, red, black and yellow - in universal 8-cylinder wire sets.

COLOR	PART NO.	COLOR	PART NO.
Blue 7541B	Red7541R
Black 7541K	Yellow7541Y

ACCEL 8.8mm 300+ RACE WIRE

The oversized 8mm wire features a double silicone construction rated at over 600°F and 60KV. The high gloss black silicone wire jacket not only looks great, but resists heat extremes, petrochemicals, ozone and moisture better than so-called blended materials for greater durability and longer life. The high-density, high-temperature silicone insulation provides greater dielectric strength and eliminates arcing and the effects of corona better than the typical OE style rubber materials. The all-Kevlar stranded inner core and fiberglass braiding adds greater pull strength and terminal retention. The stainless steel and brass terminals provide unsurpassed electrical conductivity and excellent corrosion resistance compared to terminals made of common or plated metals.

IGNITION SYSTEMS & ACCESSORIES

ACCEL SuperStock WIRES

Our SuperStock Wire is designed to upgrade an OE ignition system for high spark delivery levels for street-driven applications. The 450°F-rated silicone jacket is extruded over a tightly woven, rugged fiberglass braid which is applied over a high dielectric strength EPDM (Ethylene Propylene Diene Monomer) inner insulation for ignition wire performance that exceeds SAE specifications.

PERFORMANCE REPLACEMENT DISTRIBUTORS

ACCEL Performance Replacement Distributors are the perfect choice for your daily driver or street machine. Using all new components, these distributors feature high performance ACCEL electronics, all new components, centerless ground shaft, and a high dielectric strength cap & balanced rotor for trouble-free performance. Other features include a male tower distributor cap with brass cap and rotor contacts and steel distributor gear. Direct plug-in replacement with factory type connectors for plug and play easy installation. Legal for installation in all 50 states. C.A.R.B. approval pending.

- GM HEI Distributor w/vacuum Advance,59107
- Fits All Chevrolet V8 Engines (except 348, 409) w/HEI, standard deck height

Also now available with blue, black or red colored caps.

- Blue59107BLU
- Black59107BLK

COMPS/S 42 SERIES DISTRIBUTORS

Street Rodders have relied on the Mallory 42 Series distributors for many years. Known for its dependable, bullet-proof electronics, the 42 Series distributors are all CNC machined from billet aluminum and are available in a wide variety of applications.

42 Series Distributors Features

- Ready to run, self-contained magnetic breakerless design
- Easy 3-wire hookup with quick-disconnect wire connector
- Simple to adjust mechanical and vacuum advance
- Includes Vacuum Advance Eliminator conversion plate
- Can be converted to a traditional style female cap
- Ball bearing upper & bushing lower for maximum stability and RPM
- Compatible with CD ignition systems
- 208 male style cap w/wire retainer - 20% more cross-fire resistant
- Adjustable flange on 4248211
- Machined for o-rings (Chevrolet Only)
- Steel Distributor Gear (Ex. Chrysler)

Mallory also makes a number of other performance distributor styles including Dual-Point, Unilite, HEI, TFI, and even Front Drive Remote-Mount distributors. For a complete product listing, refer to the Mallory catalog or visit www.malloryracing.com

UNIVERSAL CHROME IGNITION COILS

- 12-volt coil features an oil-filled design and arc resistant alkylid top for superior performance, insulation and cooling.
- Ideal for street and performance applications
- Fits most original equipment coil brackets

The **29219** coil eliminates the need for a separate ballast resistor. This coil is specifically designed to deliver optimum performance when used with:

- Mallory UNILITE® or Magnetic Breakerless Ignitions
- Mallory E-Spark Conversion Kits
- Mallory Electronic Ignition Conversion Kits

NOT for use with Mallory HYFIRE® Electronic Ignition Control or any other high energy, inductive storage or capacitive discharge ignition system

The **29216** coil is designed to be used with a separate ballast resistor. It delivers optimum performance when used with:

- Mallory UNILITE® or Magnetic Breakerless Distributors equipped WITH a capacitive discharge ignition
- Mallory HYFIRE® IV and VI Series Electronic Ignition Controls
- Original equipment breakerless electronic ignition systems

NOT for use with Mallory HYFIRE® Electronic Ignition Control P/N 629, 630, 693, 29026, 29062A, 29028, 29029, 29037, or any other high energy, inductive storage ignition system

AFTERBURNER™ SWITCHABLE COIL

In the normal mode, the coil is designed to boost low RPM performance by maximizing current output to produce longer arch duration times to improved burn efficiency, resulting in enhanced throttle response, improved economy and reduced emissions. In the switched or high RPM mode, the coil is designed to boost higher RPM performance by producing higher voltage levels to better fire the mixture under high cylinder pressures conditions, such as when running nitrous or under boost. The innovative remote switch location kit makes it easy and convenient to switch the ACCEL Afterburner™ coil from one mode to the other, while inside the vehicle. Works with either with the stock vehicles inductive ignition system or with an aftermarket CD ignition system.

Afterburner™ Switchable Coil140025

140025

PROMASTER® e CORE SERIES IGNITION COILS

For street-driven vehicles with breaker point ignition or OE electronic ignition. Delivers optimum performance when used with these Mallory ignition products: UNILITE® Distributor with a HYFIRE® Capacitive Discharge Ignition; Magnetic Breakerless Distributor with a HYFIRE® Capacitive Discharge Ignition or Dual Point Distributor. Primary Resistance 0.5 ohms, Secondary Resistance 8.9K ohms, Maximum Voltage 51,000 volts, Inductance 5.6 mH, Turns Ratio 99:1, Peak Current 260 mA, Spark Duration 250 uS. Effective to 6500 RPM when used with a point type distributor and effective to 8000 RPM when used with a Mallory HYFIRE® Electronic Ignition Control.

HYFIRE® DIGITAL CD IGNITION SYSTEMS

High output multi-spark ignition system provides quicker acceleration and improved throttle response. Available with or without an easy-to-adjust digital rev limiter – 4,500 to 12,000 RPM – and no chips required! Features the latest microprocessor-controlled circuitry. Small lightweight aluminum housing is easy to install and provides maximum heat transfer for improved dependability. Works with points, OEM or aftermarket electronic ignition, or magnetic crank triggers except Hall effect.

E-SPARK® CONVERSION KITS

These low cost conversion kits eliminate points in GM, Ford and Chrysler distributors. Designed with ease of installation in mind, these kits eliminate the pesky problem of constantly having to change and adjust points forever. Even better, everything fits inside the distributor so everything is self-contained and looks original on the outside. Provides better drivability and improved throttle response No moving parts to wear out and easy to install.

IGNITION SYSTEMS & ACCESSORIES

“Shorty”

ACCEL'S RACE PROVEN U-GROOVE SHORTY SPARK PLUGS

Designed for use where spark plug clearance is a problem, these spark plugs are a full 1/4” shorter than ordinary plugs and eliminates burning the spark plug boot or dimpling the header tube. The patented U-Groove design produces a larger spark nucleus that stimulates faster combustion. The end result is an increase in performance with improved throttle response, greater fuel efficiency and reduced emissions. For complete application information, refer to the ACCEL catalog or www.ACCEL-Ignition.com.

UNIVERSAL SPARK PLUG WIRE DIVIDER BRACKET SET

Brackets are complete with competition wire separators which fit 7 or 8mm wires keeping them sufficiently insulated and separated from each other to minimize “cross-firing.” Adjustable tabs allow for easy mounting onto most valve covers. Made from aluminum and available in three attractive colors, they measure 14-3/4” long and are packaged two per set.

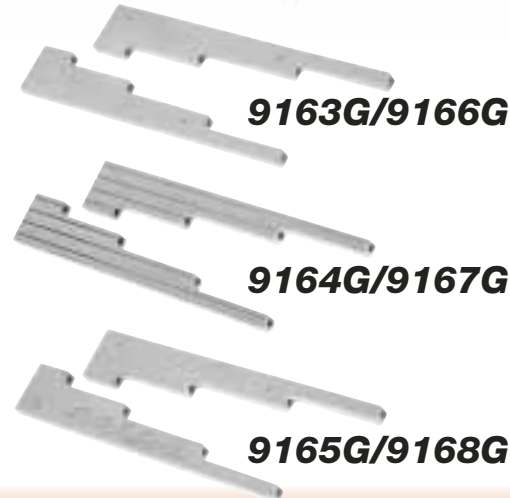

- Brushed Aluminum6018
- Blue Anodized6022
- Red Anodized6023

SPARK PLUG WIRE DIVIDER BRACKETS FOR CHEVYS

Designed to fit late model small block Chevy's 87-96 with center hold down valve covers, these aluminum wire divider brackets come complete with wire separators which fit 7 or 8mm wires, keeping them insulated and separated from each other to minimize crossfire. Brackets are brush finished and are packaged two per set.

- Brushed Aluminum Late Small Block6042

SPARK PLUG WIRE LOOM KITS

These wire loom kits preserve the life of spark plug wires. Made from die cast aluminum and polished to a high luster, these wire loom kits give an engine a show winning edge. Available in plain, ball milled and flamed for most V-8's or Chevrolet, 305, 350 1987-96 engines w/center bolt valve covers.

- SBC Center Bolt Wire Loom Kit – Plain9166G
- SBC Center Bolt Wire Loom Set - Ball Milled9167G
- SBC Center Bolt Wire Loom Set – Flamed9168G

CLASSIC T-STYLE FUEL BLOCKS

These are precision die-cast, chrome-plated blocks, ideal for plumbing tri-power set-ups, dual inlet Holley's with nitrous or any combination requiring multiple fuel distribution. Minimum flow restriction is assured with a 3/8" diameter NPT tapped inlet and 1/4" diameter NPT tapped outlets. Four corner holes and screws are provided for easy installation.

Dual outlet (2)6150
Triple outlet (3)6151
Quad outlet (4)6152

6151

CHROME-PLATED HIGH PERFORMANCE FUEL FILTER

Features a replaceable, powdered bronze element for positive filtration, while keeping restriction to a minimum. The unit has 3/8" O.D. inlet/outlet and includes two line clamps for easy installation. Individually packaged. NOT FOR FUEL INJECTION SYSTEMS.

Chrome-plated fuel filter6153
Replacement bronze element6154

6153

BILLET FUEL FILTERS

Machined from T6061-T6 billet aluminum alloy, these fuel filters incorporate a 304 stainless steel plated filter disc rated at 10 microns and flows over 15 GPM or 800 GPH. These fuel filters can be used on low-pressure carburetor or high-pressure fuel injected applications. Available in barbed or AN fitting ends.

Billet Fuel Filter 3/8" Barbed Ends6161G
Billet Fuel Filter - 6 AN Ends6162G

SHADOW SERIES AN FITTINGS

Mr. Gasket's Shadow Series is the hottest new look in AN fittings. Each fitting is exactly constructed from aluminum with a unique black and silver appearance. These fittings are available in both push on and cutter style fittings to suit nearly any plumbing project.

CUTTER TYPE SWIVEL FITTINGS FOR USE WITH STAINLESS STEEL BRAIDED HOSE:

When maximum performance and durability is required, Mr. Gasket swivel fittings deliver. These fittings are good up to 1000 PSI and are compatible with virtually all automotive chemicals.

PUSH ON TYPE FITTINGS FOR USE WITH RUBBER PUSH-ON HOSE:

These fittings are a great alternative to the stainless cutter type fitting. They're lighter weight, and easier to assemble, yet still good to 250 PSI.

SHIFTERS & ACCESSORIES

STREET ROD SHIFTER

This shifter is designed and quality-built by Hurst, "America's Number One Shifter Company". Considering Hurst's reputation for reliability, it's no wonder why street rodders worldwide choose the Street Rod Shifter for their vehicles!

- Positive detent activation
- Built-in neutral/park start safety switch
- Rear mount shifter features a machined billet aluminum handle with an attractive 1/2-20 thread billet knob for that hi-tech look
- Forward mount shifter utilizes a chrome-plated bent stick and black 5/16-18 thread knob for the car that has a "Resto" look
- All shifters come complete with mounting brackets, linkage rod, installation hardware and detailed instruction sheet
